The things that most helped my learning in this course were:

Students
team building
The internet
working in a group setting
coming to class
working as a group to meet our goals
The Professor
online tutorials
Youtube videos and online tutorials
the many resources online and demos in class and morgan's helpfulness whenever we needed
Given time to work with our groups and ask you specific questions
Resources online
Online resources
In class discussions.
The group projects
Online Tutorials
Dr. Bentons assignments
Working with my teammates on the project and learning from them.

The things that most hindered my learning in this course were:

Students
overall just intro to software development and not knowing JavaScript was a hard transition n
Early Class
time management outside of class
n/a
Myself
online tutorials
Self-taught was daunting for this topic, but I understand why it was taught this way.
Getting lost during long durations of code being quickly typed on screen
The scale of the project
Not many deliverables/sometimes grading unorganized
self-motivation
So much freedom that I get distracted
I am not a strong coder
waking up early
He spent too much class time lecturing rather than giving us time to ask questions when we were stuck and working through those.

I have the following suggestions for improving this course:

Students
I think setting timeframes and focus more on individual teams and componenets of the app would have been more effective than lecturing about a particular software.
none
none
n/a
outside research
Smaller teams
More deliverables and a structured grading system
meetings with groups to hold members accountable for the work they need to do (?)
Have the class to work with you during class time so we gain more experience.
none
Give us more time in class to work on the project and ask questions rather than lecturing for the full time.

What do you like about the instructor?

Students
Very passionate and seems to know a lot.
He cares
willingness to help
lets us focus on things we want
Is willing to meet with teams to work on any issue that comes up
Everything
He is relatable and realistic
Could not say better things about Morgan, 10/10
laid back
extreme willingness to help, kindness, understanding
Willing to help students in any way possible
Flexible
He's cool, really cares about his students.
He created an open dialogue with the class. Making it easier to learn
Very helpful and knowledgeable
open minded intellectual who challenged us to code
He is really funny and relatable.
